

Tom Harper's 28-Day Miracle

The problems with a lot of health regimens these days are that they require too much work and are often unpleasurable, “plug your nose” experiences.

Tom Harper's 28-Day Miracle was designed to be simple and pleasurable, yet extraordinary in its power and effect. Tom Harper and his inspiring story is living proof that the human body will perform miracles by the minute when we honor and edify its intelligence. All we have to do is give it the proper raw materials.

We believe that FrequenSea offers arguably the best raw materials available to man since the inception of man.

Here is how Tom Harper's 28-Day Miracle works:

For the first 20 days:

Drink eight (8) ounces of FrequenSea per day.

Note: It is recommended that you allocate your daily amount into two parts by drinking four (4) ounces in the morning, and another four (4) ounces in the afternoon for maximum results. Some test market study results have shown that FrequenSea may cause heightened levels of energy, creativity and happiness, and therefore it is not recommended before bedtime.

For the remaining eight days:

Drink four (4) ounces of FrequenSea per day.

Note: It is recommended that you allocate your daily amount into two parts by drinking two (2) ounces in the morning, and another two (2) ounces in the afternoon for maximum results. Some test market study results have shown that FrequenSea may cause heightened levels of energy, creativity and happiness, and therefore it is not recommended before bedtime.

After the 28-day period:

It is recommended that you stay on a maintenance plan of a minimum of two (2) to four (4) ounces of FrequenSea per day.

“An ounce of prevention is worth a pound of cure.”

--Benjamin Franklin

What are some of the things that make FrequenSea so powerful?

1. Invisible to the naked eye, marine phytoplankton are microscopic plants. Tom Harper's marine phytoplankton are easily absorbed at a cellular level, making its nutrients instantly bioavailable to the body. Tom Harper's marine phytoplankton is exclusive to ForeverGreen in this incredible industry.
2. Many of the elements of FrequenSea (such as frankincense, astaxanthin, rose, ginger, lemon, lime, and orange) are water-soluble ingredients. They are rendered water-soluble through ForeverGreen's exclusive AMP (Aqueous Molecular Partitioning) delivery process. More information about the AMP process can be found in the FrequenSea brochure.
3. FrequenSea features rosemary antioxidant, a completely natural preservative, as opposed to the harsh preservatives that are added in high levels to many of the other juice products on the market.
4. The sweet taste, but low sugar levels of FrequenSea help to make the 28-day experience both beneficial AND pleasurable.
